## Summary

Data Scientist and ML Engineer with an M.Sc. in Data Science and experience across e-commerce optimization, consulting, and agriculture. Background spans contextual bandits, generative AI, multi-agent systems, and end-to-end ML pipelines, with a focus on practical business impact.

## Experience

**Senior Data Scientist** - Hive Technologies

Berlin, Feb 2026 - Present

- Designed and deployed an online reinforcement learning system (contextual bandits, Thompson Sampling) on AWS SageMaker for real-time e-commerce optimization, generating 10k+ in monthly revenue across enterprise merchants
- Led A/B testing initiatives and ML performance monitoring to drive data-informed decision-making
- Owned scalable data pipelines in Redshift via dbt modeling

**Senior ML Engineer** - Accenture

Berlin, Aug 2024 - Feb 2026

- Developed an ML system combining classical ML and GenAI for automated data labeling, achieving 60% coverage at 80% confidence and saving 800 person-days
- Built reusable agents and a unified evaluation library for internal developers, accelerating GenAI development cycles
- Built a multi-modal RAG proposal generation solution, reducing proposal effort across global teams

**Data Scientist (Part-time)** - Yara International

Berlin, 2022 - 2024

- Built deep and linear cloud-removal models for satellite time series, enabling product recommendations on cloudy days and reducing fertilizer waste by 15%
- Developed a RAG-based internal chatbot (AWS Bedrock, LangChain) over employee feedback forms, reducing HR analysis time by 80%

**Security Analyst** - Dell RSA

Cairo, 2019 - 2021

- Supported 500+ enterprise customers on RSA IAM products and built custom solutions for their environments

## Education

**M.Sc. Data Science** - University of Potsdam

Potsdam, 2021 - 2024

- **Grade:** 1.6
- **Thesis:** Comparative analysis of explainable AI methods for ICU risk prediction models (Hasso Plattner Institut)

- **Grade:** 0.99 (Excellent with highest honors), **Class rank:** 4th
- **Thesis:** Medical Image Inpainting using Adversarial Networks (University of Stuttgart)

## Publication

**Adversarial Inpainting of Medical Image Modalities** - ICASSP

2019

- <https://arxiv.org/abs/1810.06621>

## Technical Skills

### Languages

Python, SQL, R, Bash

### ML & Data

PyTorch, TensorFlow, scikit-learn, LangChain, LangGraph, dbt, pandas, Streamlit

### Data Platforms

Redshift, Snowflake, PostgreSQL, Metabase, MongoDB, OpenSearch

### Cloud & Tools

AWS (Bedrock, SageMaker), Azure AI, Docker, Git, CI/CD, Linux

### Specializations

Generative AI & LLMs, RAG, Multi-Agent Systems, Contextual Bandits, Reinforcement Learning, Off-Policy Evaluation, Causal Inference, A/B Testing, Time Series

## Languages

|         |       |
